# WEEKLY CRYPTOCURRENCY MARKET ANALYSIS

Hello crypto traders welcome to this week's 111th edition of Cryptonaire Weekly. The overall Cryptocurrency Market Cap stands at \$188 Billion. We have seen a \$13 Billion decrease in the Market Cap since the last week. Bitcoin price is currently around \$6950 and ether price is currently at \$133 The current market cap for bitcoin is \$126 Billion and for altcoins the current market cap is \$62 Billion.

Most major cryptocurrencies have broken down of their range. Traders should stay on the sidelines and avoid catching a falling knife. After the current fall, the crypto markets are likely to turn-around early next year. Hence, keep the shopping list ready to make the most of the depressed prices.

Large investors, holding between 1,000 to 1 million Bitcoins, have been buying since the crypto bubble burst in end-2017. They currently hold 42.1% of all Bitcoin supply compared to 37.9% during the peak of the previous bull market. This shows that these investors are bullish on the long-term prospects of Bitcoin, hence, they have been accumulating at lower levels. On the other hand, the top 1,000 addresses now control 34.8% supply, a marginal increase from 34.4% at the end of 2017.

Though the institutional interest in cryptocurrencies has been gradually increasing, it is still only a slow trickle. Tom Jessop, the president of Fidelity Digital Assets, believes that the lack of regulatory clarity and absence of track record are the main reasons that are holding back the institutional investors. However, he believes that these problems will "solve themselves with time."

While Bitcoin is staring at a deeper fall in the short-term, Mark Yusko, the chief executive and chief investment officer at Morgan Creek Capital Management, expects Bitcoin to rally to \$100,000 by 2021. That is not all, he expects Bitcoin's bull run to continue and reach \$250,000 by 2025 and \$400,000 or \$500,000 by 2030. While the long-term targets look attractive, the short-term is painting a bearish picture. Buying in a downtrend can quickly turn the position into a loss. Hence, the traders should wait for the decline to end before buying.

## Percentage of Total Market Capitalization (Dominance)

Bitcoin	67.06%
Ethereum	7.25%

Dear members and Leaders LIYEPLIMAL!

On November 16, more than a week ago, we jointly organized LIYEPLIMAL's birthday and the launch of SimbCoin, to which you honored us with your presence.

I would like to express my thanks to the three DIAMONDS members who responded to our invitation despite a very busy schedule. Thank you for their experience and involvement in this SIMBCOIN / SIMBCITY project. Without them, this evening could not have had such prestige. We will retain their valuable advice and their testimonials for a long time.

I wanted to personally thank the PLATINUMS members for attending this event, which was important to us. Thanks to your presence, many people were interested in our activity, we received tremendous media coverage, the participants were satisfied as ever ...

I also want to thank all the other members of LIYEPLIMAL for this beautiful evening of exchanges and sharing. I was happy to be able to meet you and I hope that the event was up to your expectations.

Thank you, also to the various delegations:

That of Burkina Faso who offered me a piece of metal art SIMBCOIN that I never cease to contemplate on my desk, that of Madagascar, Togo, Senegal of Mauritius, Martinique, Guadeloupe, the France, Norway, USA, etc ....

I will not forget to finally thank the staff of GLOBAL INVESTMENT TRADING who made themselves available for the event and strongly participated in the smooth running of this evening. My team and I hope to see you again soon for a new event. Continue to follow us and do not hesitate to support us!

The calendar of the next events named SIMBCOIN WORLD TOUR will be communicated to you very soon. We invite all Leaders to mobilize as many people as possible in the countries that will be mentioned for the success of this tour.

In addition to the pleasure of meeting you and having you with us that day, your presence was an encouragement and a real reward.

With deepest gratitude, I beg you to believe, dear members and leaders, in expressing my most devoted feelings.

Long live GLOBAL INVESTMENT TRADING

Long live LIYEPLIMAL.....Long live SIMBCOIN.....Long live SIMBCITY

**The CEO Thanks you!**

# CRYPTO TRADE OPPORTUNITIES

## BITCOIN - BTC/USD

Bitcoin turned down from the 20-day EMA on Dec. 9. This is a negative sign as it shows that the sentiment is to sell on minor rallies rather than buy the dips. The failure of the bulls to defend the support at \$7,080 has attracted further selling.

With both moving averages sloping down and the RSI close to the oversold zone, the advantage is clearly with the bears. The next support on the downside is \$6,526. If this level also cracks, the sentiment will become hugely negative and will delay the recovery in price.

However, we anticipate the bulls to mount a strong defence at \$6,526 level. If the support holds, a relief rally to the 20-day EMA and above it to \$7,870 is possible. We shall turn positive after the price breaks out and sustains above the resistance line of the wedge. Until then, traders can remain on the sidelines.

**ETHEREUM - ETH/USD**

COINBASE:ETHUSD, 1D 130.95 ▼ -1.41 (-1.07%) O:132.36 H:132.66 L:130.67 C:130.95

Ether has dipped below the recent low of \$131.80, which is a bearish sign. Both moving averages are sloping down and the RSI is in oversold territory, which indicates that bears are in command.

If the price sustains below \$131.80, the decline can extend to the next support at \$120 and below it \$100. However, if the bears fail to sustain the price below \$131.80, the bulls will attempt a bounce, which will face stiff resistance at the 20-day EMA. If the price again turns down from the 20-day EMA, the downtrend will resume.

Conversely, a break above the 20-day EMA will indicate accumulation at lower levels. We will wait for a reversal pattern to form before recommending a trade in it.

**RIPPLE - XRP/USD**

The range between \$0.21262 and \$0.2365 resolved to the downside on December 16. It was followed by another strong move down, which broke below the recent low of \$0.20256. This is a huge negative as it shows that the buyers are still not keen to support XRP at these levels.

Both the moving averages are sloping down and the RSI is in oversold territory, which shows that bears have the upper hand. The next support on the downside is \$0.17.

Our bearish view will be invalidated if the bulls quickly push the price back above \$0.21262. Such a move will indicate a strong demand at lower levels. However, we suggest traders wait for a trend reversal pattern to form before initiating long positions.

**Bank of Hodlers**

Let Your Crypto Work For You.

www.bankofhodlers.com

- SECURE WALLET
- EARN UP TO 9% INTEREST
- GET A CRYPTO-BACKED LOAN

**BITCOIN CASH - BCH/USD**

COINBASE:BCHUSD, 1D 194.62 ▼ -1.33 (-0.68%) O:195.95 H:196.75 L:194.26 C:194.62

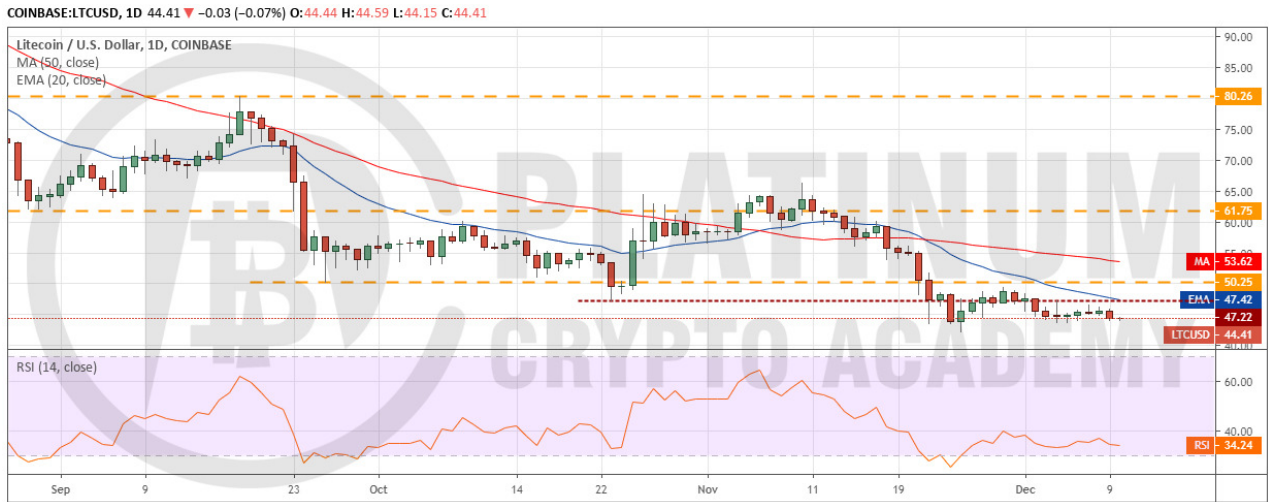

Bitcoin Cash has dropped close to the recent low of \$192.10. If the bears sink the price below this support, the downtrend will resume. The next support on the downside is at \$166.98. The downsloping moving averages and the RSI close to the oversold zone suggests that bears are in the driver's seat.

Contrary to our assumption, if the bulls defend the support at \$192.10, the cryptocurrency could rebound to the 20-day EMA. A breakout of this level is likely to carry the price to \$227.04. We will wait for the price to breakout of this level before turning positive.

**Trade  
Network  
Automate**  
All in one place.

LITECOIN - LTC/USD

Litecoin dropped below the critical support at \$42.16 on December 16. This is a huge negative as it shows a lack of buyers even at these levels. With the fall, the small bullish divergence that was developing on the RSI has been invalidated.

Unless the price quickly climbs back above \$42.16, the decline is likely to extend to the next support at \$32.

Our bearish view will be negated if aggressive value-buying by the bulls can push the price back above \$42.16. However, as the cryptocurrency has been consistently making lower highs and lower lows, we will wait for the trend to change before proposing a trade in it.

# ADVANCEMENTS IN THE CRYPTOCURRENCY WORLD

Italy Goes for Bitcoin, Lithuania Issues Crypto Collectible, Sweden Eyes Digital Currency

As the European Union considers developing its own digital currency to rival Facebook's cryptocurrency project Libra, consumers and politicians in Italy, Lithuania and Sweden are exploring the adoption of Bitcoin and digital assets.

Italy, with a gross domestic product of \$2 trillion, has the ninth largest economy in the world and the second highest debt in the euro area after Greece. This economic instability coincides with consumers and merchants who are moving toward digital assets for daily business transactions.

While Italian residents prefer cash over other payment methods, market data provider Statista reveals that as of November of 2019, an estimated 835 stores and companies in Italy now accept Bitcoin. Lombardy, Trentino-South Tyrol and Veneto are Italy's leading regions for BTC adoption. The country also currently has 62 Bitcoin ATMs installed across several different cities.

Meanwhile, Lithuania's reserve bank is set to launch a blockchain-based digital token for collectors in the spring of 2020 as the country plans to expand its fintech ecosystem. The cryptocurrency collectibles, which will only be available via the central bank's online store, commemorate the country's declaration of independence in 1918 and its 20 signatories.

## Bitcoin Video Goes Viral on TikTok as Crypto Sees Mainstream Attention

This week, a bitcoin video went viral on TikTok for the first time. It follows mentions of BTC by several high-profile investors, individuals, and companies.

The video shared by crypto entrepreneur Thomas Schulz showed a room full of mining equipment with the caption, “this is why GPU prices went up.”

### **Growing popularity of bitcoin and crypto**

Bitcoin is still considered to be in a short-term bear trend following its drop from \$13,900 to sub-\$7,000.

Media mentions of the dominant cryptocurrency have dropped, and the number of deals happening in the crypto industry has noticeably decreased.

But, as bitcoin approaches its 12th birthday and the third block-reward halving in its history, the mainstream awareness of cryptocurrencies in general has started to increase.

On Dec. 15, for instance, the popular product discovery platform Product Hunt tweeted “bitcoin.”

## New Data Indicates That Europeans Are The Most Active Traders For Bitcoin Futures On BitMEX

Fresh data reveals that for the last one month, European business hours have recorded high levels of activities on Bitcoin futures trades within the BitMEX platform. High volumes of BitMEX XBT/USD futures contracts were witnessed during European business hours, Bitcoinist reports.

The data shows that Europe is slowly becoming a hot crypto market especially in the last one year. The region has adopted crypto-friendly banking services and wealth levels are growing coupled with a superb tech sector, which have enhanced interest for crypto trading.

This year, trading BTC positions increased steadily before hodling behaviors were witnessed leading to a wave of buyers who want to take advantage of the situation. BitMEX ranks high among the highly active Bitcoin markets, increasing to the popularity of Bitcoin futures.

Despite the high popularity of Bitcoin futures and cryptos in general, traders and users in Europe are still facing some challenges. Crypto users and traders are forced to comply with highly stringent KYC guidelines and it is expected that tight monitoring will be implemented in the near future. Such aspects have led to some crypto-based companies to close shop such as BottlePay which is a crypto payment platform which cited restrictive AML regulations as the reason for their closure.

## There are now more than 350,000 verified publishers on Brave

Privacy-focused browser Brave shows no signs of slowing down as it reached a new milestone three weeks before the end of the year. According to data from BATGrowth, there are currently more than 350,000 verified publishers on the platform and over 220,000 BAT addresses.

### 350,000 publishers support Brave's effort to revolutionize advertising

Few companies in the crypto industry have seen the kind of success Brave has. The privacy-focused Browser, created by Mozilla's own Brendan Eich, has been reaching milestone after milestone, surpassing much older and much more established competitors.

The latest major milestone for the company has been surpassing 350,000 publishers on its platform. The number of websites, creators, and companies that signed up for Brave's rewards program has been on the rise since last year. Data from BATGrowth has shown that there are currently 351,111 verified publishers on the platform, with more than 231,000 of them being YouTube creators.

The number of verified publishers on other platforms, including Twitch, Twitter, Reddit, Vimeo and GitHub, have all increased between 20 and 35 percent in less than a month.

One of the few metrics that have shown a "slower" growth is the number of BAT addresses. According to BATGrowth, the network had 221,910 addresses at press time, which is just a 5 percent increase from the 211,371 addresses it had this time last month.

## Indian Legislator Says Cryptocurrency Is Inevitable, Despite Ban on Bitcoin

Subramanian Swamy, an economist and member of the Indian parliament, says cryptocurrency is unstoppable.

According to a report by media outlet Sarkaritel, Swamy says China is ahead of the US in piloting digital currencies and India now needs to catch up.

*“Cryptocurrency is inevitable. I advocate that India as an established super power in software should accept to the transition to cryptocurrency.”*

His comments on digital assets follow reports that the Reserve Bank of India is exploring the use of central bank digital currencies.

Swamy is participating in the launch of an international initiative for “cryptocurrency issues” from India by chairing a conference by BEGIN India Think Tank at the United Nations, supported by the UN Technology Innovation Labs.

## Christmas Bonus?: Maduro's Gov't Promises 8M Venezuelans Half a Petro Each

Venezuelan President Nicolás Maduro announced that this week the government will pay half a Petro to Venezuelan retirees and public workers as Christmas bonus.

With a total of 4,500,000 retirees and 3,500,000 public workers, Maduro said in a speech on Dec. 15 that he expects to deliver half a Petro to more than 8 million Venezuelans this week. This follows up on remarks Maduro made in mid-November.

With a fixed value of \$60 established by the Venezuelan government, the average Petro bonus that each Venezuelan will receive will be equivalent to \$30. It is estimated that the government will give out some \$240 million, according to the valuation given to the state cryptocurrency.

Maduro decreed that this week will begin a “new stage of economic and social protection” within the Venezuelan economy, referring to the delivery of half a Petro to Venezuelans.

## Tata's IT Arm Says Its New Toolkit Will Enable Faster Blockchain App Development

**Tata Consultancy Services (TCS) has launched a new blockchain developers' kit that it claims will make developing apps up to 40 percent faster.**

TCS, the information technology subsidiary of Tata Group and India's largest company by market cap, said Monday that its Quartz DevKit is now generally available as an "intuitive, low code development kit for enterprises to quickly build and deploy blockchain applications on any popular blockchain platform."

Designed to remove some of the complexity of building with blockchain, the toolbox allows devs to create apps on major blockchain platforms such as ethereum, Hyperledger Fabric or R3 Corda, according to a press release.

"We developed the Quartz DevKit to help [clients'] teams rapidly put together high-quality pilots using smart contracts on any platform with reduced coding effort. We have received very positive feedback from our pilot customers, and are pleased to make the DevKit available for use at scale," said R Vivekanand, global head of Quartz at TCS.

## 1.6 trillion Bitcoin transactions facilitated over last 2 years

Bitcoin and XRP were the world's largest virtual assets going into 2019. However, while Bitcoin continues to dominate the market over the year, Ethereum did manage to overtake XRP on the cryptocurrency charts.

Over the course of the last twelve months, Bitcoin and Ethereum have recorded a period of prolific performance, with the two crypto-assets helping scale the collective market by almost \$75 billion from 1 January to 30 November.

According to a report by Blockchain Capital, 2019 witnessed major highs in the market with regards to Bitcoin, whereas Ethereum also recorded strong fundamentals. The data cited by the report suggested that the market valuations of BTC and ETH were strongly oppressed over the 2nd half of 2019. That being said, the report added that the overall gains of the two cryptocurrencies remained positive.

At press time, Bitcoin was priced at \$7255. The valuation of the king coin was up by approximately 95 percent year-to-date, while Ethereum registered a growth of over 10 percent. Although other assets such as BCH and Litecoin recorded better performances than ETH in terms of price, they lagged behind in terms of market cap.

## New Zealand's ASB Bank Owns 21% in TradeWindow Following \$1.7M Round

New Zealand's ASB Bank, owned by Commonwealth Bank of Australia, has participated in a new \$1.7 million funding round by blockchain startup TradeWindow.

The startup provides a software-as-a-service supply chain solution to create a “single trading window” accessible by all parties involved in the transaction from the importer to the exporter.

ASB Bank is now the second-biggest shareholder after TradeWindow CEO, owns 21%

Following the seed round, ASB Bank now owns a 21% stake in the company and is the second-largest shareholder after TradeWindow's founder and CEO AJ Smith, The New Zealand Herald reports Dec. 16.

According to an announcement by TradeWindow, ASB Bank participated in the round alongside two new shipping and logistics-focused investors including local family office Leroux and their partner Te Hana consulting, as well as Perth-based Rae family office.

## Cardano will be joining Microsoft, LinkedIn, and Norwegian Airlines as McCann's client

The Cardano Foundation announced that it has appointed McCann Dublin, the Ireland-based hand of the global advertising agency, as its brand strategy and design agency. According to the company's announcement, McCann will be tasked with realigning the Cardano brand with the company's mission.

### **The Cardano Foundation employs a global advertising agency to develop its brand**

The Cardano Foundation, an independent organization tasked with overseeing the development of Cardano, has set its sights on strengthening the image of its ambitious blockchain project. With numerous pilots in the works and dozens of important updates and milestones achieved by the Cardano team, the last step in global adoption is brand recognition.

Despite its ambitious goals, dedicated team, and loyal following, Cardano has been struggling to breach into the mainstream crypto industry and compete in the major league. And now, the Swiss-based organization announced that it appointed an advertising company to help it reach a wider audience.

According to the company's official announcement, McCann Dublin, the Ireland-based arm of global advertising giant McCann, will be tasked with developing the company's brand strategy and design.

## TOP TEN BITCOIN BILLIONAIRES – BEST CRYPTOCURRENCY TO INVEST IN

Hi Crypto Network,

At its all time high in 2017, Bitcoin prices were a staggering \$20k a coin. Early adopters undoubtedly had a field day racking in thousands, millions to billions of dollars in profits. There are at least 7 people who attained billionaire status as of 2017 thanks to Bitcoin.

### BEST CRYPTOCURRENCY TO INVEST IN – TOP TEN BITCOIN MILLIONAIRES

#### Richest people in BTC

Leading the pack is the father of Bitcoin Satoshi Nakamoto. Whether it is a group of highly secretive individuals or a lone actor behind the pseudonym, Nakamoto's identity remains unknown. But what is clear, is that a wallet associated with Nakamoto was allocated 1 m of the 21m created Bitcoins. This makes Nakamoto the richest Bitcoin holder worth \$19 B.

Other big winners from Bitcoin are C.E.O's and founders of Blockchain companies. Changpeng Zhao, better known as CZ in the Cryptosphere, is the founder of Binance, the biggest crypto exchange globally. He is reportedly an owner to a \$2b crypto wealth fortune. Coinbase owner Brian Armstrong founded the digital currency exchange in 2012 and owns between \$900m – \$1b worth of Crypto. Joseph Lubin and Antony Diioris are both Ethereum founders and are worth \$1b – \$5b and \$1 b respectively.

Cameroon Winklevoss and his twin brother Tyler, of the Facebook idea row with Mark Zuckerberg, walked home with \$65m from the lawsuit and put it to good use. They ventured into Capital projects among them Bitcoin and were rumored to have owned 1% of the world's Bitcoin at some point. They later founded Gemini crypto exchange and their crypto wealth is somewhere over \$1b. Mathew Boszak worth \$1b lucked out as well when he came across Bitcoin in its formative years in 2011. He claims to have introduced Bill Clinton and Richard Branson to Bitcoin by gifting them some.

### **Notable billionaires investing in Bitcoin**

Warren Buffett slammed Bitcoin calling it “rat poison squared” while his vice chair at Berkshire Charlie Munger likened trading in Bitcoin to “just dementia” in their opposition to investments in Bitcoin. However, it seems their counterparts in the billionaire's circle are not listening.

Hongkong billionaire Li Ka-Shing was the highest investor in Bakkt's series A funding which raised \$182.5m in its first round. 90 year old Li worth \$34.9 b, through his company Horizon Venturing threw his confidence behind the Bitcoin and crypto platform set to provide Bitcoin futures trading.

Last year, the Virgin Group boss, Richard Branson, invested \$30m in Bitcoin payments processor BitPay. Branson has been promoting Bitcoin and Blockchain technology and has even been the face of scams luring people using his name. Running an over 400 company portfolio, Branson took time to defend crypto against unscrupulous actors who undermine the “positive developments of Bitcoin” through fake stories.

Perhaps the best known name that has weathered all the winters while remaining bullish throughout is that of billionaire Mike Novogratz. Being an ex-hedge fund manager at Fortress Investment Group and a former partner at Goldman Sachs, his support for Bitcoin is backed up by expertise in finance. He also put his money where his mouth is and founded Galaxy Digital, a crypto merchant bank self-styled as the ‘Goldman Sachs of crypto.’

## THE TOP 10 RICHEST PEOPLE IN BITCOIN AND CRYPTOCURRENCIES

10. Michael Novogratz CEO of the Digital-Assets Bank Galaxy Digital, worth \$700 million to \$1 billion.

9. Brock Pierce helped funded several crypto-based companies, including Coinbase and Tether. He's worth \$700 million to \$1 billion.

8. Anthony Di Iorio, founded the blockchain platform Ethereum and the cryptocurrency wallet Jaxx. He's worth \$750 million to \$1 billion.

7. Matthew Roszak, the cofounder of the blockchain startup Bloq who founded Tally Capital, a crypto-focused private-investment firm, was an early investor in bitcoin. He now has \$900 million to \$1 billion in crypto.

6. Brian Armstrong, CEO of the digital-currency exchange Coinbase, has a crypto fortune of \$900 million to \$1 billion

5. The Late Matthew Mellon, invested early in Ripple's XRP. He now has a crypto fortune of \$900 million to \$1 billion although his estate has been passed on due to his death last year he is definitely warranted to being on the list!

4. Winklevoss Twins, estimated crypto fortune of \$900 million to \$1.1 billion. Early investors in bitcoin and founded the digital-currency exchange Gemini in 2015.

3. Changpeng Zhao, Founder and CEO of Binance, \$1.1 billion to \$2 billion in crypto investments.

1. Chris Larsen, Cofounder of Ripple, has \$7.5 billion to \$8 billion in cryptocurrencies.

2. Joseph Lubin, Cofounder of Ethereum who previous an executive at Goldman Sachs, has between \$1 billion and \$5 billion in crypto.

## BEST CRYPTO TO INVEST IN NOW

There are over 2000 cryptocurrencies in the crypto market with more constantly coming in. Yet, Bitcoin has managed to maintain dominance in both market cap and represents the largest transfer of volume in the market. This shows that Bitcoin enjoys a significant level of trust that enables it to remain a force even when prices are low. The Bitcoin halving scheduled for May 2020 could also push Crypto prices up due to the halving of Bitcoins rewarded in mining.

## ARE CRYPTOS A GOOD INVESTMENT?

Bitcoin Millionaire Erik Finman made his first multiple millions when he was only 18 after turning a \$1000 gift from his grandmother to a reason to skip collage. Finman owns 401 Bitcoins worth \$3,694,473 as of this writing. He has been encouraging young people to make long term investments in Bitcoin and other Cryptocurrencies.

Finman took a leap of faith when he spent his gift on a then little known digital currency to change economic classes so quickly. This does not mean that investing in digital currencies are the fastest ways to create wealth for our generation, however, cryptocurrency presents the largest pool for self directed investment. When in doubt, it is best to consult finance experts.

## PLATINUM PROJECT INFORMATION

### BITIRA

#### Details:

#### **An Overview of BitIRA: Why You Should Consider This Service for Your Retirement**

It is always wise to have a plan to replace your income after retirement. Many people will opt for retirement investments, but these are usually limited to paper assets such as stocks and mutual funds. Further you will hardly ever see anyone investing in cryptocurrencies.

BitIRA, however, provides a way for Americans to include cryptocurrencies in their retirement savings by helping its customers convert an existing IRA or 401(k) into a “Digital IRA”. A Digital IRA is a form of a self-directed IRA that allows you to invest in crypto such as Bitcoin, Ethereum, Ripple and more.

In addition to enjoying the same tax-deferred status that come with all IRAs, Digital IRAs offer many of the benefits of digital currencies, such as anonymity, security, and growth potential. Additionally, BitIRA provides several other benefits that other Digital IRA providers cannot match.

## How BitIRA Works

The first step towards purchasing cryptocurrency for your IRA is to open a self-directed IRA. With such an account, you have full control over the digital currency in your retirement, while a certified custodian manages certain administrative tasks that are required by law. While the custodian can be a bank or any other financial institution that is approved by the IRS, BitIRA has partnered with Preferred Trust Company to act as the custodian for its customers.

The custodian is your account's overseer. They will, therefore, execute the purchase and sale of your assets (only with your approval, of course), maintain transaction records, and file any needed reports for tax on your behalf.

In addition to its partnership with Preferred Trust Company, BitIRA has partnered with a top exchange to make buying and selling of digital currencies from your account fast and simple. Rather than requiring its customers to go through the rigorous verification process from an exchange, BitIRA's solution allows you to place your purchases at unrivaled speeds.

To store the digital credentials to your currency, BitIRA offers 'The World's Most Secure Digital Currency IRA.' The propriety solution combines five components to deliver an **unmatched security** level for your credentials. These five components are multi-sig wallets, personal, custom hardware devices, cold storage in protected vaults, end-to-end insurance, and compliance with cryptocurrency security standards. This combination comprises the world's first insured cold storage solution for Digital IRAs.

## Why You Should Open a Digital IRA with BitIRA

If you are still not convinced, you may be wondering why you should choose a Digital IRA with BitIRA over other conventional retirement accounts. Here are some important reasons:

- **Tax-deferred growth**  
Cryptocurrencies have significant growth potential. By opening a Digital IRA with BitIRA, you can take advantage of this potential without worrying about taxes. Tax is deferred on any growth of the crypto for as long as they are in your IRA.
- **Security**  
As BitIRA has created the World's Most Secure Digital IRA, with the highest degree of security, the assets that you purchase through BitIRA are fully protected and insured against any cases of hacks, fraud, theft or mistakes.
- **Diversification**  
One of the ways of mitigating risk is by diversifying your assets. Rather than hold stocks and mutual funds only, BitIRA lets you add crypto to your retirement savings as well.

Finally, BitIRA's latest addition sets it apart from competitors. On 10th July 2019, BitIRA announced the **launch of My BitIRA**, which allows users to maximize transparency and control over their cryptocurrency retirement accounts. Through this platform, users can track the performance of their IRAs and initiate transactions from wherever they are.

BitIRA is a leading expert in setting up and managing Digital IRAs. Undoubtedly, this service offers a solution to any American who would want to hold some crypto in their retirement funds.

For those who want to learn more about how they can get started, BitIRA is currently offering a free info guide to readers of Cryptonaire Weekly. To claim your free info guide, simply **click here**.
