# Weekly Cryptocurrency Market Analysis

The cryptocurrency market continued to rally last week, with the overall market cap increasing by 14% to \$441 billion. Bitcoin rose 6% to \$9,400 while Ethereum's price increased 8% to \$690.

In the current cycle, Bitcoin continued to lag behind the overall market. As a result, Bitcoin dominance is down to 36.5% from 44.9% in the beginning of April.

With a very healthy consolidation happening for a few weeks already and the trading volume at the highest since mid-February, it is looking more and more likely that the worst is over and the bulls are back in charge of the crypto markets. As Bitcoin's price is still over 50% below its all-time-high, we believe that this new cycle is just getting started and it looks like the risk and sentiments of investors is going to last for a while.

Altcoins have been leading the charge in the current bull run, and over the next few weeks, we believe there will continue to be some interesting reshuffling in the top 20 coins. As well as we expect the ICO market to get hot and good projects will be selling out quickly once again.

# Advancements in the Cryptocurrency World

## Japan's SBI Unveils New Plans to Start an Exchange for Major Cryptocurrencies

<https://news.bitcoin.com/japans-sbi-plans-start-exchange-major-cryptocurrencies/>

Japan's SBI Holdings has reportedly unveiled new plans for its cryptocurrency exchange. The company has set a target launch date and is preparing to list major cryptocurrencies. The group's CEO expects the new exchange to "be number one in the blink of an eye." The company had planned for SBI Virtual Currencies to launch "in the autumn of 2017 and at the latest the beginning of 2018," Minkabu publication recalled.

## Ethereum Bug Causes Integer Overflow in Numerous ERC20 Smart Contracts

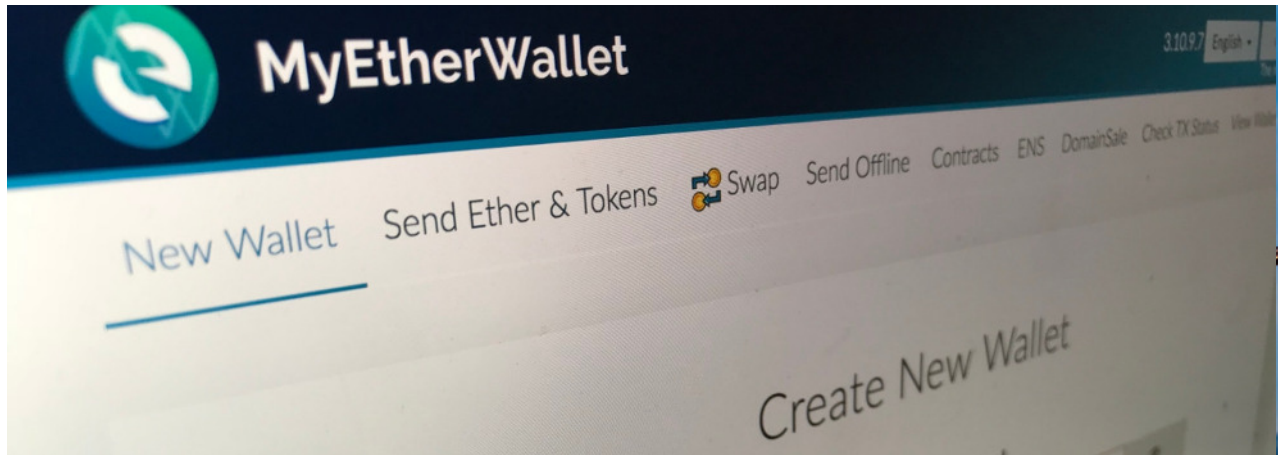

<https://thenextweb.com/hardfork/2018/04/25/ethereum-smart-contract-integer-overflow/>

Blockchain security startup PeckShield has come across a critical vulnerability in multiple Ethereum smart contracts (based on the ERC20 protocol) which results in integer overflow – a common issue which occurs when computers deal with numeric values outside of the range that can be represented with a given number of bits. The researchers have noted that their study found that the bug is present in a number of tokens, including UGToken, SMART, MTC, FirstCoin, GG Token, CNY Token, MESH and SMT tokens.

## Crypto Wallet MEW Hit by DNS Attack That Drained Some Users' Accounts

<https://techcrunch.com/2018/04/24/myetherwallet-hit-by-dns-attack/>

There is concern, tears and lost money in the world of crypto once again after MyEtherWallet (MEW), one of the most popular wallets on the internet, was hit by a DNS hack that saw some users lose their cryptocurrency. MEW said in a statement that "a couple of Domain Name System registration servers were hijacked around 12PM UTC 24 April to redirect users to a phishing site." Not all visitors to the site during the hijack were impacted, but MEW said that "a majority" of those who were had been using Google's DNS.

## Gemini Exchange to Launch Market Surveillance Technology with Nasdaq

<https://www.nasdaq.com/press-release/gemini-to-launch-market-surveillance-technology-in-collaboration-with-nasdaq-20180425-00327>

Gemini Trust Company, LLC (Gemini) and Nasdaq Inc. (Nasdaq:NDAQ) announced today that Gemini will be leveraging Nasdaq's SMARTS Market Surveillance technology to monitor its marketplace. The technology, which is considered the most widely deployed surveillance system in the world, will enable Gemini to monitor across all of its trading pairs, including: BTC/USD, ETH/USD and BTC/ETH. Further, SMARTS will also surveil activity across the Gemini auction process that is used to determine the settlement price for the Bitcoin XBT futures contracts that trade on Cboe's CFE Exchange.

## Angellist: Number of New Crypto Job Listings Doubled in the Last Three Months

<https://news.bitcoin.com/angellist-number-crypto-job-listings-doubled/>

Angellist, a popular website that allows startups to raise money from angel investors, has revealed data about new crypto job listings on its platform. The company details the hiring needs of companies in the crypto space and what jobs are in demand. Angellist revealed its new crypto job listing statistics last week. Citing that even though the price of bitcoin has dropped 60% since December of last year, the company wrote: In the last 3 months, the number of new crypto job listings has doubled.

## Bitcoin Cash Adoption: Crypto Cafebar, Gold Vendor, Concealed-Carry Clothing

<https://news.bitcoin.com/bitcoin-cash-adoption-continues-crypto-cafebar-gold-vendor-concealed-carry-clothing/>

An increasing number of stores have started accepting bitcoin cash (BCH) and a few other cryptocurrencies. This bitcoin cash adoption roundup features five vendors that recently started accepting the digital currency including a brand new cafebar dedicated to 15 cryptocurrencies. Japan is a leader when it comes to the number of merchants accepting cryptocurrencies since its Payment Services Act, which went into effect in April of last year, legalizes cryptocurrency as a means of payment.

## St. Louis Federal Reserve says Bitcoin is 'Like Regular Currency'

<http://fortune.com/2018/04/28/st-louis-federal-reserve-says-bitcoin-is-like-regular-currency/>

The Federal Reserve Bank of St. Louis has provided some high-profile validation for a core premise of Bitcoin and other cryptocurrency. A blog post this week based on an earlier Fed research paper said that "bitcoin units have no intrinsic value" – but added that currencies "such as the U.S. dollar, the euro, and the Swiss franc . . . have no intrinsic value either."

## Crypto Mining Made Up 10% of AMD's Revenue in Q1

<https://www.coindesk.com/crypto-mining-made-up-10-of-amds-revenue-in-q1/>

## Crypto Mining Made Up 10% of AMD's Revenue in Q1

Cryptocurrency mining demand accounted for as much as 10% of AMD's first-quarter revenue this year, according to the chip maker. "The strength in Radeon products was driven by both gaming and blockchain demand. We believe blockchain was approximately 10% of AMD revenue in [the first quarter of] 2018," chief financial officer said Devinder Kumar during an earnings call on Wednesday after AMD revealed that it made \$1.65 billion in first-quarter revenue, a 40% increase year-over-year.

## Shenzhen, China Backs \$79 Million Fund To Support City's Blockchain Startups

<https://cointelegraph.com/news/shenzhen-china-backs-79-million-fund-to-support-citys-blockchain-startups>

The launch of a 500 mln yuan (about \$79 ml) Blockchain venture capital fund for Chinese city Shenzhen was announced at a Blockchain Expo held in the city, local news outlet Sohu reported yesterday, April 22. Yesterday's announcement at the China Electronic Commerce Association-hosted Expo stated that the Shenzhen Angel Investment Guidance Fund, an almost \$8 bln fund launched in late March, will contribute 40 percent.

## France Slashes Cryptocurrency Tax Rate from 45% to a Flat 19%

<https://www.ccn.com/frances-cryptocurrency-tax-more-than-halved-to-19/>

France has more than halved its cryptocurrency income tax rate on capital gains, incentivizing citizens to invest and even take some profits in the market. The French Council of State has decided to change the classification of cryptocurrency capital gains, thereby lowering the tax rate from as high as 45% to a flat rate of 19%, a French online publication revealed. With the added generalized social contribution (GSC) for most incomes, the tax rate would rise but still falls well below the 40% threshold.

## 20MW Solar Farm Set to Power Crypto Mining in Rural Australia

<https://news.bitcoin.com/20mw-solar-farm-set-to-power-crypto-mining-in-rural-australia/>

Reports have indicated that planning approval has been granted for a 20-megawatt solar farm that will be used to power cryptocurrency mining and a data center in Collie, Western Australia. The application for the solar farm has been made by Hadouken Pty Ltd, which is owned by Australian Ben Tan. Mr. Tan previously co-founded Nasdaq-listed international solar power company, Vivopower International PLC. The solar park will be used to power cryptocurrency mining activities and a data center. Approval for the farm was recommended by the Southern Development Assessment Panel.

# Platinum ICO Information

## VIREO

Vireo is the digital green revolution - the solution to connect local green projects with global impact investors through the blockchain. For everyone to take part.

### Project Details:

**Vireo will lead the digital green revolution** – connecting impact investors from around the world with an array of sustainable green projects in emerging markets through innovative blockchain solutions.

The **digital green revolution** means to capitalise on technology for financing and developing green projects. Many emerging market countries in S.E. Asia, Africa and South America are ready for sustainable, green projects that present as tremendous impact investment opportunities as well. But, these projects often face finance and development obstacles – obstacles which Vireo intends to overcome.

Rather than pursue traditional financial solutions, which do not always scale to promising green projects in emerging markets, there becomes a need for alternative financing channels that are secure, transparent, and easily accessible to a range of sophisticated investors.

Therefore, Vireo was created. Vireo is launching the world's first green exchange offering financial products directly linked to green assets (projects) and sustainable commodity production while creating **substantive, yet stable returns**.

- ◆ From **9% to 15% p.a** total return during the **construction period** (typ. **1 to 3** years)
- ◆ From **3% to 6% p.a.** (excluding capital gain) during the **operational period** (typ. **15 to 25** years)

Vireo thoroughly vets each green asset (project) to first confirm, and then optimise its potential sustainability and productivity, both as an effective green project for the local community and as a successful investment vehicle. Vireo then offers such candidate projects competitive financing solutions:

- ◆ Between **1% and 4% p.a.** during the **construction period**
- ◆ Between **1% and 6% p.a.** during the **operational period**
- ◆ Coverage of basic risks: CAPEX increase, construction delay, interest coverage or working capital requirements, insurance against country political risk

Vireo integrates these vetted assets into a transparent, intuitive digital platform that manages their financing and project development. Vireo is the first company offering financial instruments digitally linked directly to **fungible, green** commodity production based in emerging markets to investors worldwide.

- ◆ Securities targeting **energy** will pay interest based on **green kWh** produced as well as **certified carbon emission credits** earned
- ◆ Securities targeting **water treatment** will pay interest based on **m3 of water cleaned**

In structuring the first **cost-efficient** and regulated **green exchange**, dedicated to support the smart green economy and offering both digital and traditional security instruments, Vireo creates a **transparent, comprehensive** and **regulated** financing channel with minimal financial friction as competitive financing solutions for green investments. Through Vireo's ground-breaking, digital platform, investors from across the board will find Vireo's products accessible, with straightforward risk/return profiles available.

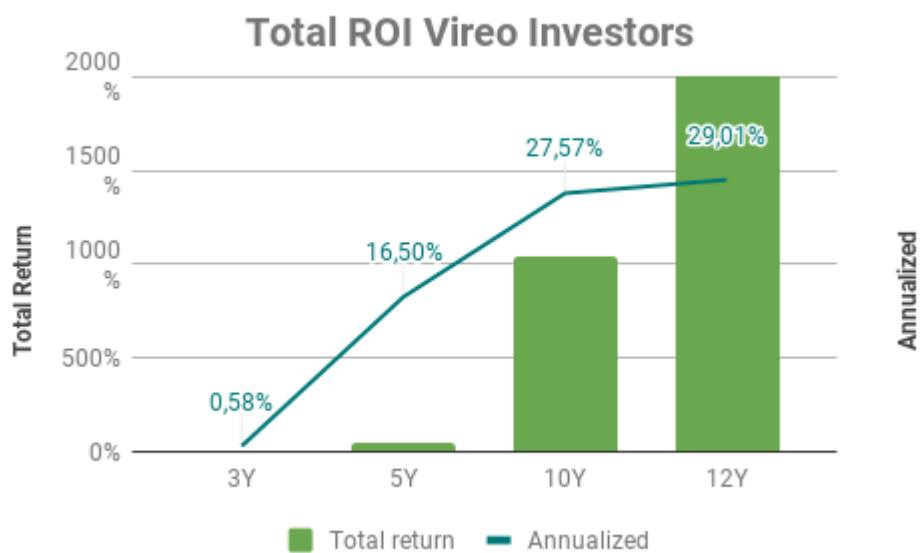

Vireo will use **innovative** digital financial tools, such as the **blockchain** and **digitised securities**, which will be **fully compliant** with financial regulations and **audited** by regulatory authorities. Vireo will also be guided by international standards for sustainable investments, specifically those set by the **World Bank**, the **UN Climate Change Conference (COP21)** and the **UN Sustainable Development Goals Agenda**.

Vireo will provide three distinct instruments that function seamlessly together:

- ◆ **Seeds:** Digital securities backed by real assets corresponding to early stage investment in green projects. **Seeds** investors will be able to select green project asset acquisition and development and will be entitled to returns derived from investing in the project(s') **construction period**.
- ◆ **Crops:** Digital green assets directly backed by assets, through the underlying green projects and its green commodities production. Crops will have the benefit of not only being valued based on how much green commodity each project yields during the operation period, but also on its market value separate from the project itself.

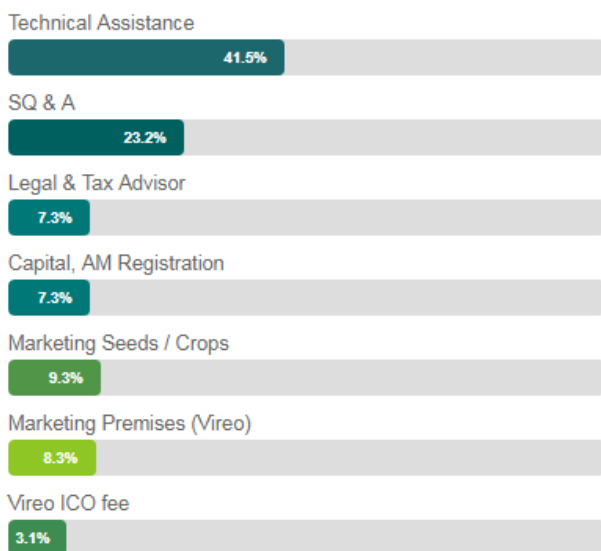

- Vireo Certificates:** These are regulated financial instruments indexed on either Seeds or Crops as an alternative investment vehicle for those looking for a more diversified option. Investors receive returns based on Seeds and Crops market values.

Vireo has USD 200M worth of investment ready projects in its immediate pipeline. The Vireo solution is clearly scalable and aims to become the reference financing solution for green projects throughout the world. Vireo is confident of its robust business model and expects breakeven within 3 years and to achieve an attractive effective annualised return of 16.5% within 5 years.
