Weekly Cryptocurrency Market Analysis

The bounce back in the cryptocurrency market continued last week, with the overall market capitalisation increasing by 18% to \$380 billion. Bitcoin rose 9% to \$8,800 while Ether's price increased 18% to \$600.

The current market capitalisation for the crypto markets is \$380 billion and for Bitcoin is \$150 billion and other altcoins is \$230 billion.

With the breakout lasting for around 10 days now, many are announcing that the bull market is back. The cryptocurrency market has been largely driven and reflexive, because of this the greater that people agree with something, the more likely that it's going to happen.

It's far kind of crazy when you recall how the renewed optimism all commenced 12 days ago. This shows that sentiment inside the cryptocurrency market shifts speedy and dramatically. buyers need to pay very close attention in the event that they want to time the market nicely.

Another observation is that all through this bounce back, altcoins had been outperforming bitcoin. Typically, while the cryptocurrency market is at the beginning of a rebound, bigger coins generally tend to appreciate faster than smaller ones. but, it is not the case this time.

The tax season for a number of countries has just passed, which offers some other cause for people to be bullish. but, we trust that plenty of crypto traders around the world do not file their capital profits from buying and selling cryptocurrencies. therefore, it is highly luckily the fund outflow from cryptocurrency to pay for taxes is very lower than some may think.

As an end result, we consider it is vital to have a balanced portfolio among the Large Cap coins and smaller altcoins so you can take advantage of the market at the right time.

Crypto Trade Opportunities

Bitcoin (BTC)

Wait for a Breakout of \$9,000 – Then Entry @ \$9,000 - Exit @ \$10,000

Ethereum (ETH)

Entry @ \$590 - Exit @ \$700

Litecoin (LTC)

Wait for a Breakout of \$165 - Then Entry @ \$165 - Exit @ \$200

Neo (NEO)

Wait for a Breakout of \$82 – Then Entry @ \$82 - Exit @ \$100

Ripple (XRP)

Entry @ \$0.82 - Exit @ \$1

Lisk (LISK)

Wait for a Breakout of \$13.5 – Then Entry @ \$13.5 - Exit @ \$18

Advancements in the Cryptocurrency World

MasterCard Eyes Blockchain for Fighting Fake Identities

<https://www.coindesk.com/mastercard-eyes-blockchain-fighting-fake-identities/>

In an application released by the U.S. Patent and Trademark Office (USPTO) last Thursday, Mastercard describes a system in which a semi-private or private blockchain would be used to receive and store identity data, the pieces of which could include a "name, a street address, tax identification number" and more. The company states in the filing, which was originally submitted in September 2017, that the tech could help it block the use of fake identity data within its systems.

Coinbase Buys Earn.com, Gaining Top Talent in the process

<https://www.nasdaq.com/article/coinbase-buys-earncom-gaining-top-talent-in-the-process-cm948650>

Cryptocurrency exchange Coinbase is buying Earn.com, a social network that allows users to earn digital currency by replying to emails and completing small tasks online. Coinbase CEO Brian Armstrong made the announcement in a blog post today, April 16, 2018. In addition to welcoming the entire Earn.com team, Coinbase has made Earn.com co-founder and CEO Balaji Srinivasan its first CTO. Both companies are located in the Bay Area. This is Coinbase's fifth acquisition so far and its most substantial to date. Coinbase has not revealed how much it paid for Earn.com, but to offer an idea of the company's evaluation, Earn.com has raised more than \$120 million in a series of funding rounds.

Cheapair.com Considers Bitpay as Coinbase Terminates Merchant Processing Solutions

<https://news.bitcoin.com/cheapair-com-bitpay-coinbase-merchant-processing-solutions/>

Travel booking website Cheapair.com has been accepting bitcoin as a payment option for flights and hotel bookings since 2013. The company currently uses Coinbase to process its bitcoin payments. However, CEO Jeff Klee announced on Friday that bitcoins received by Cheapair.com are immediately converted to fiat because the company has to immediately transfer them to its travel supplier partners such as airlines and hotels. "Coinbase has been providing that service for us, but at the end of the month they are getting out of that business, leaving us scrambling for an alternative."

AWS Is Making Hyperledger and Ethereum Easier to Use

<https://www.coindesk.com/aws-making-easier-use-hyperledger-fabric-ethereum/>

Amazon Web Services, the e-commerce giant's cloud computing arm, has unveiled a new service for launching out-of-the-box blockchain networks for the Ethereum and Hyperledger Fabric protocols. In a blog post published on Wednesday, AWS chief evangelist Jeff Barr wrote that the newly available "templates" allow clients to "launch an Ethereum (either public or private) or Hyperledger Fabric (private) network in a matter of minutes and with just a few clicks." He went on to explain: "The templates create and configure all of the AWS resources needed to get you going in a robust and scalable fashion." The post provides detailed instructions for setting up an Ethereum template, which supports mining, as well as an EthStats page that provides network metrics and an EthExplorer tool that displays the transactions and smart contracts entered into the ledger.

China's Telecom Giant Huawei Launches Blockchain-As-A-Service Platform

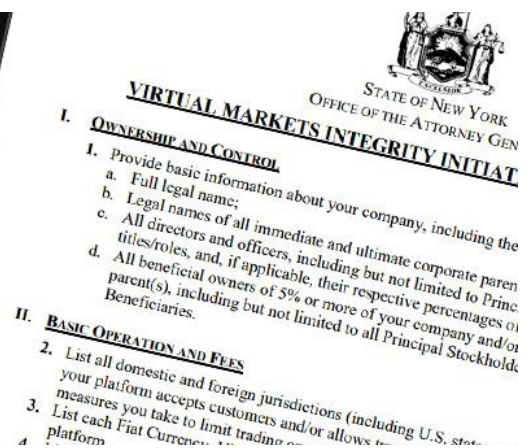

<https://cointelegraph.com/news/chinas-telecom-giant-huawei-launches-blockchain-as-a-service-platform>

Chinese telecommunications giant Huawei revealed its latest Hyperledger-fuelled Blockchain offering at a conference in Shenzhen Tuesday, April 17. The Blockchain-as-a-Service (BaaS) tool, which comes a month after the release of Huawei and Hyperledger's joint project Caliper, will be known as the decidedly low-key "Blockchain Service." Hyperledger is an open source Blockchain operation created by the Linux Foundation in 2015. Since its inception, it has grown to incorporate over one hundred major business sponsors and seen multiple partnerships and integrations.

New York Attorney General Launches Inquiry Into Cryptocurrency Exchanges

<https://bitcoinmagazine.com/articles/new-york-attorney-general-launches-inquiry-cryptocurrency-exchanges/>

As part of an effort to protect cryptocurrency investors and bring greater transparency into how cryptocurrency exchanges operate, New York Attorney General Eric Schneiderman has sent letters to 13 virtual currency exchanges requesting they disclose key information about their operations. "With cryptocurrency on the rise, consumers in New York and across the country have a right to transparency and accountability when they invest their money," the attorney general said in a statement today, April 16, 2018. "Yet too often, consumers don't have the basic facts they need to assess the fairness, integrity and security of these trading platforms."

Samsung Is Looking Into Blockchain For Its Huge Global Supply Chain

<https://www.bloomberg.com/news/articles/2018-04-15/samsung-jumps-on-blockchain-bandwagon-to-manage-its-supply-chain>

Samsung Electronics Co. is considering a blockchain ledger system to keep track of global shipments worth tens of billion of dollars a year, according to Song Kwang-woo, the blockchain chief at Samsung SDS Co., the group's logistical and information and technology arm. The system could cut shipping costs by 20 percent, according to SDS. While companies around the world have said they're planning to deploy blockchain technology on everything from cross-border payments to tracking the life-cycle of supermarket chickens, Samsung Group is one of the first global manufacturers to take a serious look at using the distributed ledgers in its operations. SDS is working on the system for Samsung Electronics, the conglomerate's crown jewel.

Crypto Exchange Kraken To End Services In Japan, Cites Rising Costs Of Business

<https://www.bloomberg.com/news/articles/2018-04-17/cryptocurrency-exchange-kraken-pulls-out-of-japan-citing-costs>

Kraken, one of the world's longest-operating cryptocurrency exchanges, will end its trading services for Japanese residents. The San Francisco-based company cited the rising costs of doing business in Japan for its decision, though it said it may re-enter the country in the future. It tentatively plans to cease all its services, which began in October 2014, by the end of June, it said in an emailed statement. "Suspending services for Japan residents will allow us to better focus on our resources to improve in other geographical areas," the company said in the statement. "This is a localized suspension of service that only affects residents of Japan and does not impact services for Japanese citizens or businesses domiciled outside of Japan."

Ether Capital Shares Commence Trading on Canadian Stock Exchange

<https://news.bitcoin.com/ether-capital-shares-commence-trading-canadian-stock-exchange/>

Ether Capital's stock began trading on Toronto's NEO Exchange on Thursday. As of this writing, the company's ETHC shares are currently trading at approximately \$2.45 USD. The company's chief information officer, Ben Roberts, has told reports that the company raised \$45 million CAD – falling 10 percent short of the company's expectations. Ether Capital had originally sought to issue 20 million shares priced at \$2.50 each, however, was only able to sell 18 million shares. The private offer was co-directed by CIBC Capital Markets and Canaccord Genuity Corp.

The Green currencies dedicated to Green and Sustainable Development

Invest in a platform that will connect all impact investors around the World to local green projects

Vireo offers:

- ✓ A transparent and secure investment channel, and rewarding investment opportunities to all investors
- ✓ Equal development possibilities that will contribute to fight against Climate Change

Check our platform at
exchange.vireoseeds.com

Why Invest in Vireo?

- ✓ Vireo is launching the world's first green regulated exchange offering digital green currencies as well as financial products directly linked to green assets (projects)
- ✓ Vireo has over 200 Million US Dollars-worth of investment-ready green projects in its immediate pipeline

Through its platform, Vireo offers:

- ✓ Equal investment opportunity and substantive returns (from 3% to 15% per year)
- ✓ Investments in only promising green projects validated by third parties and compliant with COP21 and UN Sustainable Development Goals
- ✓ Full transparency regarding all transactions and possibility to exit investments 24/7
- ✓ Investments will be secured (backed) by cash and green infrastructural assets

For Project Developers:

- ✓ Access affordable financing solutions (from 1% to 5% per year) without onerous demands guarantees
- ✓ Local project developers will have access to technical assistance to ensure best quality for projects

You are interested in a collaboration with Vireo, you want to join Vireo's initiative or you just want to get more information, don't hesitate to contact us!

Platinum ICO Information

PumaPay

PumaPay: Paving the Way for a Crypto Economy

Project Details:

We're living through the golden age of cryptocurrencies, but not yet that of crypto usability. As ICOs are mushrooming, it is almost impossible not to come across some breaking news about the launch of a new token. However, very few of these projects have the holistic vision to drive growth.

Decentralized Vision, a Gibraltar-registered blockchain startup announces the launch of PumaPay, a ground-breaking PullPayment protocol aimed at empowering merchants across industries and investors alike, by putting them back in charge of their capital. Developed "from the ground up", as the company's CEO Yoav Dror and key figure behind the project explains, PumaPay is set on a path to take on banks and credit cards.

A World Without Banks

Breaking away from the typical technical pattern of traditional push-based transactions, PumaPay innovates by enabling a pull action over the blockchain. Unlike other crypto protocols requiring A to manually push funds to B, with PumaPay things are exactly the opposite, where B can pull funds directly from A's wallet, if authorized by A. Additionally, these pulls may occur regularly or one time only, depending on the billing arrangement between users.

Apart from being the hallmark of PumaPay, this technical upgrade confers versatility to the solution, which the blockchain has never seen before, facilitating billing practices that are currently supported only by traditional means like credit cards and banks, without the associated financial hurdles that come with these methods. Essentially, PumaPay supports all traditional payment types from pay-per-use, single, recurring, to instalment-based, and restricted payments on the blockchain.

Aiming to "serve merchants, not exploit them", according to Yoav Dror, PumaPay transcends industries and eliminates middlemen. Currently, merchants cross-industry are at risk of facing chargebacks, exorbitant fines due to consumer's remorse, and whopping transaction fees that range anywhere from 2% to 15%, in some cases deemed high-risk as with adult entertainment and gaming.

Bringing the flexibility of credit cards to the blockchain, PumaPay paves the way for a token economy and a world without banks. The variety of cases in which PumaPay could be used is illustrated in its White Paper, where users can buy anything with the PMA token from monthly streaming media and gym membership subscriptions to securing on-time utility bill payments, paying for online consultations, a dinner out and a lot more.

There are many good ICOs out there, yet very few transcend their digital boundaries. Will they follow PumaPay's lead and continue to innovate?

Official Videos:

Puma Pay Pull Payment Protocol: <https://youtu.be/CXqGz8gZm6I>

The Pull Payment Protocol: <https://youtu.be/8uJfMQQKXuY>

Puma Pay's Economy Eco-System: <https://youtu.be/Rp7ZWt0Sbiw>

PumaPay Machine

Key personalities behind PumaPay and market leaders from multiple sectors have expressed their confidence in the "PumaPay machine", and hence in the solution's potential for widespread adoption.

Building on Bitcoin's legacy, the viability and sustainability of PumaPay's PullPayment protocol relies on a solid ecosystem represented by Early Adopters and the PumaPay Pride. That said, the PMA token does not exist in a vacuum, but integrated in a solid, ever-expanding structure represented by big brands like Fashion TV, Rent 24, CCBill, Backpack.io, ImLive, AEBN and other key players in the adult entertainment industry, as well as RoomDao, a cryptocurrency startup who recently joined the ranks of PumaPay, and many more. All these small to large-size businesses have committed to adopt the protocol immediately from the get-go and use the PMA token as a favoured means of payment. They will also use the token to incentivise their customers and encourage extensive PMA use to buy goods and services, official voices from some of these companies told PumaPay in confidence.

More companies are churning in to adopt the protocol every day, leading the PumaPay team to believe that demand for the token will increase exponentially post launch, as the number of businesses to adopt the solution will also grow.

Taking innovation to the next level, the PumaPay Pride is another hallmark feature of the PumaPay, only this time of the wallet, and is intended to serve as a directory for all companies large or small accepting PMA as a means of exchange for their goods or services in the proximity of the user. By offering merchants from all areas of industry more exposure to crypto holders, PumaPay transgresses the boundaries of the mere digital world and paves the way for a token or crypto economy, channelling the existing half a trillion US dollars' crypto-invested capital scattered around the world into global economy to drive growth.

By providing merchants and crypto holders alike with a viable, 'evergreen' payment solution, PumaPay turns cryptocurrencies into a proper, real means of exchange for goods and services, solving the crypto usability problem. Furthermore, the value of the PMA token will grow with demand and widespread adoption.

Making the headlines of Forbes, Huffington Post, Investing.com, TechBullion, Venture Beat, CoinTelegraph, LeapRate and other leading publications, PumaPay is also expected to capture the spotlight of cryptocurrency exchanges and become a tradable asset sooner rather than later, leveraging the economic potential of the token.

Roadmap:

Q2 2018:

- * PumaPay TGE
- * PMA Token V1.0 (ERC20)
- * PumaPay Mobile Wallet V1.0 (Android, iOS)
- * SDK I - allowing basic integration with the protocol and accepting PMA by merchants
- * Integration with ImLive – enabling purchasing using PMA tokens

Q4 2018 - Q1 2019:

- * PumaPay Wallet V3.0 (Android, iOS, Chrome), supporting all the PullPayment mechanisms
- * SDK III – allowing integration with all PullPayment mechanisms as well as development of 3rd party extension services
- * Integration with ImLive White Label
- * Integration with Early Adopters

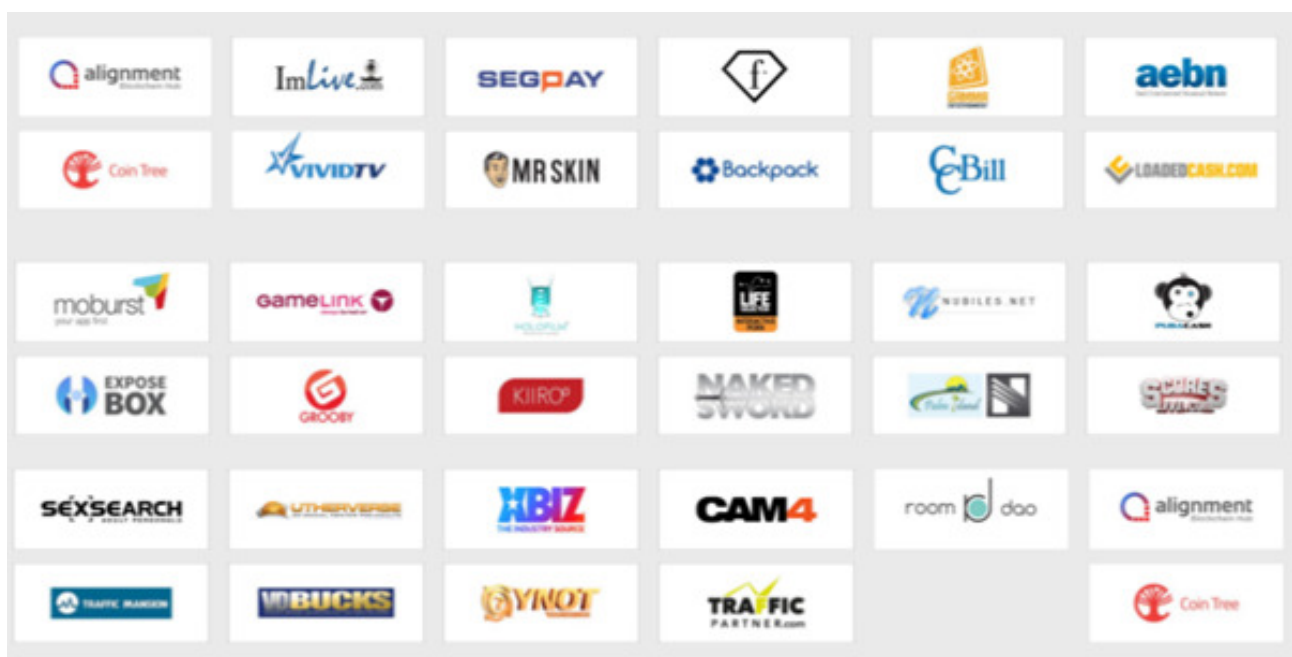

Q3 2018:

- * Testing next gen. blockchain
- * PumaPay Wallet V2.0 (Android, iOS, Chrome) - supporting all the recurring payments
- * SDK II – allowing integration with all PullPayment mechanisms as well as development of 3rd party extension services
- * PullContract Wizard – allowing creation and deployment of parameterized PullContracts
- * PumaPay Pride

Token Allocation

- * 20% Public Contributors (pro-rata)
- * 20% Strategic partners and early adopters
- * 35% The Company
- * 15% Advisors, bounty, bonuses and fees
- * 10% Founding Team

Collaborators
